

# Phase-2 Practice Project-TestNG

**Repository:** [https://github.com/Joshnitha/Phase2\\_Practice-Projects/](https://github.com/Joshnitha/Phase2_Practice-Projects/)

## Description

Create a TestNG framework that helps to test the bus ticket booking application in multiple environments.

## Background of the problem statement:

As a part of developing TestNG and POM framework, the admin requires a resource like multiple virtual machines to execute it in different environments.

## Source Code:

Class:TestBase

```
package com.ninjademo.qa.Base;
```

```
import java.awt.Desktop;
```

```
import java.io.File;
```

```
import java.io.IOException;
```

```
import java.lang.reflect.Method;
```

```
import org.openqa.selenium.WebDriver;
```

```
import org.openqa.selenium.chrome.ChromeDriver;
```

```
import org.testng.ITestContext;
```

```
import org.testng.ITestResult;
```

```
import org.testng.annotations.AfterMethod;
```

```
import org.testng.annotations.AfterSuite;
```

```
import org.testng.annotations.BeforeSuite;
```

```
import org.testng.annotations.BeforeTest;
```

```

import com.aventstack.extentreports.ExtentReports;

import com.aventstack.extentreports.ExtentTest;

import com.aventstack.extentreports.reporter.ExtentSparkReporter;

public class TestBase {

    public static WebDriver driver;

    public static ExtentReports extentreports;

    public static ExtentTest extentTest;

    public static void openBrowser()
    {

        driver = new ChromeDriver();

        driver.manage().window().maximize();

        driver.get("https://tutorialsninja.com/demo/");

    }

    @BeforeTest

    public void getnameMethod(ITestContext context)

    {

        extentTest=    extentreports.createTest(context.getName());

    }

    @BeforeSuite // this method will be excuted before suite begins its execution

    public void InitalizeExtentReport()

    {

```

```

ExtentSparkReporter sparkreporter = new ExtentSparkReporter("reportpom.html");

extentreports = new ExtentReports();

extentreports.attachReporter(sparkreporter);

// on the report display more information about OS, browser, java etc

extentreports.setSystemInfo("OS", System.getProperty("os.name"));

extentreports.setSystemInfo("JAVA", System.getProperty("java.version"));

}

```

@AfterSuite

```
public void generateReports() throws IOException
```

```

{

    extentreports.flush();

    Desktop.getDesktop().browse(new File("reportpom.html").toURI());

}

```

@AfterMethod

```
public void generateTestStatus(Method m, ITestResult result)
```

```

{

    if(result.getStatus() == ITestResult.FAILURE )

    {

        System.out.println("Capture Screenshot");

        extentTest.fail(result.getThrowable());

    }

    else if (result.getStatus() == ITestResult.SUCCESS) {

        extentTest.pass(m.getName() + " is passed");

    }

}

```

```
    }  
    }  
}
```

## Class: HomePage

```
package com.ninjademo.qa.Pages;
